## Forklift Brush

215092/215093

### Unit Overview

Introducing the T-Mech Forklift Brush. This durable and efficient cleaning attachment is crafted from powder-coated steel and polypropylene bristles, ensuring strength and reliability. Available in two models—one with a stand and one without—the optional stand protects the bristles and supports the brush when not in use, extending its lifespan. Featuring an impressive 1300mm width, five rows of high-quality bristles, and reinforced construction, this brush is designed for secure and effective operation. Let's get started with your dependable forklift cleaning solution!

### Specifications

#### Dimensions (L\*W\*H):

- **Without Stands:** 132 x 40 x 35 cm
- **With Stands:** 134 x 40 x 36 cm

#### Weight:

- **Without Stands:** 48.7KG
- **With Stands:** 55.3KG

#### Material:

- **Framework** - Cold Rolled Steel
- **Slide** - Galvanized Sheet
- **Bristles** - Polypropylene

## Safety Advice

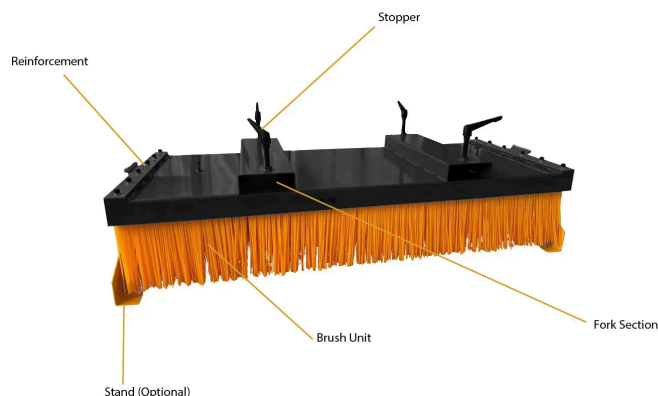

- Ensure you have read and fully understood the instruction manual and safety advice before using this product.
- Ensure the forklift brush is securely attached to the forklift before operation. Perform a visual and physical check to confirm proper attachment before each use.
- Inspect the brush and its components regularly for signs of wear, damage, or malfunction. Do not use if any defects are found.
- Always wear appropriate personal protective equipment (PPE), including gloves, safety boots, and high-visibility clothing, while installing, using, or handling the brush.
- Only trained and authorised personnel should install, operate, and remove the forklift brush.
- Use proper handling techniques or mechanical lifting devices during installation and removal to prevent injury.
- Ensure the working area is clear of pedestrians and obstacles. Install safety barriers or clearly demarcate operational zones to minimise collision risks.
- Store the brush and stand (if applicable) in a designated location with flat surface away from high-traffic zones to minimise the risk of accidents or equipment damage.
- Do not modify the brush, stand, or forklift in any way that could compromise safety or void warranties.
- When not in use, store the forklift brush and stand (if provided) in a designated area.
- Never attempt to repair or modify the brush, stand, or forklift unless qualified and authorised to do so. Use only manufacturer-approved parts and procedures.
- Avoid direct contact with the bristles during installation, removal, or maintenance, as they may cause injury. Use gloves and handle with care.
- Never use the forklift brush for purposes other than those specified by the manufacturer. Misuse can lead to accidents or damage.

## Parts

---

**Fork Section**

2 piece(s)

---

**Brushes**

5 piece(s)

---

**Reinforcement**

2 piece(s)

---

**Stand (Optional)**

2 piece(s)

---

**Stopper**

4 piece(s)

## Steps (9)

1.

Please note: this product is designed for indoor warehouse only. Using the product for any other purpose or on any other surface may lead to the product being damaged or broken.

## 2. Setup

Position the forks to the correct distance apart to locate into fork hoops.

## 3. Setup

Drive forks into fork hoops until the tips of the forks are exposed from the other end, firstly ensuring that the twist screws are suitably retracted.

#### 4. Setup

Once the forks are fully inserted tighten the twist screws onto the fork blade ensuring that they are fully tightened. The attachment is now ready for use.

#### 5. Operating the Forklift Brush

Lower the Brush so that the bristles are in contact with the sweeping surface and drive at a slow jogging pace and in a straight line. Distance will depend on sweeping surface and type of debris being swept.

#### 6. Operating the Forklift Brush

Once the desired distance has been reached, lift the brush clear of the sweeping surface and reverse to cover the same straight line run again (this is optional to the user dependent on surface, debris and desired result). Repeat until the area is clean.

#### 7. Operating the Forklift Brush

Approach the individual piles at right angles to the sweeping direction so as to create a single heap. This heap is now ready for collection/scooping to your wasted container.

#### 8. Maintenance

- Ensure all components are clean and free of debris after each use to maintain product integrity and effectiveness.
- Inspect the brush, bristles, and attachment points regularly for wear, damage, or defects. Do not use the product if any issues are found.
- Perform regular maintenance on the brush and forklift as recommended in the user manual to ensure safe and effective operation.

## 9. Troubleshooting

- **WHAT DO I DO IF THERE ARE MISSING PARTS FROM MY ORDER?**

If there appears to be any part missing from your order, contact our friendly and helpful Customer Support Team within 7 days of receipt.

- **FOR ALL OTHER ISSUES, PLEASE CONTACT OUR CUSTOMER SUPPORT TEAM.**
